**THE OCTOPUS**

Underwater J-Box is designed for underwater illumination applications such as pond, lake, and fountain lighting. The side panel features:

- **Proof connection.** Fitting size must match cable size to ensure water tight seal.

**NOTE:** Brass liquid tight fittings recommended.

</table>

**Internal Connector:**

- **Liquid tight fittings.**
- **Tight available. Specify number required at time of order**

**Construction:**

- **Black silicone, 50 durometer**
- **IP68**
- **UL 676**

**Mounting:**

- **Surface mount bracket attached**

**Warranty Disclaimer:** Alterations of product are not recommended by FOCUS and voids warranty.

**Supplied standard without holes or fittings. To receive a tapped hole and liquid tight fitting specify at time of order.**

**Precautions:**

- **Specify at time of order.**

**To highlight objects out of water (SL-33 & SL-40 only)**

- **Underwater - Spill way or fountain**

**Movement:**

- **More water movement results in larger increases in spread and movement will distort or increase the beam spread. The top of the water acts as a lens. Clear lenses, or no movement, will allow the beam to remain true or accurate.**

**Beam Spreads:**

- **Clean or clear water will produce the maximum quantity of light.**
- **Dirty water will reduce the light dramatically. More wattage or tighter beam spreads will be needed to see the impact of the light source or fixture.**
